Patna, Bihar, India

## SUMMARY

Full Stack Engineer with 3+ years of experience owning production applications end-to-end across backend, web, mobile, cloud deployment, and applied AI. Strong in Java/Spring Boot, FastAPI, React, React Native, microservices, MongoDB, Redis, Docker, and LLM integrations. Built products across EdTech, healthcare, and SMB software, with hands-on ownership of architecture, security, deployment, and production operations. Currently pursuing an MS in Artificial Intelligence and Cybersecurity at IIT Patna.

## TECHNICAL SKILLS

**Languages:** Java, Python, C++, JavaScript, TypeScript

**Frontend:** React, Angular, React Native, Expo

**Backend:** Spring Boot, FastAPI, REST APIs, Spring Security, Spring Cloud Gateway, Microservices

**Databases & Messaging:** MongoDB, Redis, MySQL, Firebase, WebSockets/STOMP

**AI:** Gemini AI, Groq, LLM Integration, AI Chatbots, Recommendation Systems

**Cloud & DevOps:** Docker, Kubernetes, Nginx, Linux, Hostinger VPS, CI/CD, Git/GitHub

## EXPERIENCE

### Chapterfeed Learning Space Pvt. Ltd.

May 2023 – Present

*Full Stack Engineer*

*Patna, Bihar*

- Owned end-to-end architecture, development, deployment, and maintenance for 7 production applications across education, healthcare, and business software as the primary software engineer.
- Designed backend and application architectures using Spring Boot, FastAPI, React, React Native, MongoDB, Redis, Docker, and Kubernetes, supporting 150+ daily active users across deployed platforms.
- Built reusable authentication, authorization, OTP verification, file-storage, notification, and security modules reused across 5+ applications, reducing repeated implementation effort by approximately 40%.
- Architected microservices-based backends using Spring Cloud Gateway, JWT/RBAC security, Redis, and independent service deployment patterns across 8+ backend services.
- Integrated Gemini AI and Groq into production workflows including coding assistants, educational chatbots, admission prediction, and recommendation features.
- Managed VPS production infrastructure using Docker, Nginx, CI/CD, monitoring, backups, deployment validation, and performance optimization.
- Implemented real-time product features using WebSockets/STOMP and Firebase Cloud Messaging for chat, live notifications, and synchronized user experiences.
- Mentored 50+ students in Java, Python, C/C++, web development, and full-stack engineering.

## SELECTED PROJECTS

### VP Dental Hospital | *Healthcare Management Platform* | [vpdentalhospital.com](https://vpdentalhospital.com)

2026

- Built a production dental clinic platform with an Angular public website, role-based administration portal, and an 8-module Spring Boot microservices backend.
- Designed Spring Cloud Gateway routing, JWT authentication, MongoDB persistence, Redis-backed token revocation, internal service authorization, audit logging, and correlation-ID based request tracing.
- Implemented patient profiles, dental case sheets, FDI/perio charting, appointments, consent capture, file management, invoicing, GST, payments, ledgers, and outstanding-balance workflows.
- Added secure media validation, thumbnail generation, soft deletion, parallel backup exports, and VPS deployment using Java 17, Maven, Nginx, and service-level releases.

### InAppCode | *AI Coding Practice Platform* | [inappcode.com](https://inappcode.com)

2026

- Owned end-to-end development of a React Native and TypeScript mobile coding platform with adaptive difficulty, streaks, accuracy tracking, and multi-language practice.
- Built a FastAPI backend for code evaluation and AI-generated practice workflows using Groq and Gemini with provider fallback, rate limiting, and resilient request handling.

- Designed a custom in-app coding keyboard and deployed the platform with Docker and Kubernetes using rolling deployment patterns.

**TrulyMentorAcademy** | *Academic Management Platform* | trulymentoracademy.com 2023 – Present

- Built and deployed a production academic management platform used by 100+ daily active students, teachers, and administrators across web and mobile interfaces.
- Developed 15+ role-based modules covering attendance, fees, tests, study materials, routines, reports, notifications, enrollment, document management, and live chat.
- Architected a Java 17 Spring Boot backend with 5 deployable services, MongoDB, JWT/RBAC authentication, OTP verification, refresh tokens, Redis rate limiting, and shared security middleware.
- Integrated WebSocket/STOMP chat, Firebase push notifications, email notifications, file uploads, and React/React Native role-specific dashboards.

**SmartRaseed** | *Digital Receipt & Business Management Platform* | smartraseed.com 2024 – Present

- Built and deployed a digital receipt platform used by local businesses to generate 1,000+ receipts with downloadable PDFs, public receipt links, transaction history, and analytics.
- Developed a React Native/Expo mobile app with OTP signup, JWT sessions, bilingual UI, receipt workflows, WhatsApp sharing, and QR-enabled receipt/payment flows.
- Implemented two Spring Boot microservices for authentication and business operations using MongoDB, Spring Security, OTP flows, password recovery, file uploads, and branded PDF receipt generation.

## ADDITIONAL PROJECTS

---

**College Bazaar** | *Admission & Career Guidance* | collegebazaar.in 2025 – 2026

- Built a React, FastAPI, and MongoDB platform for college discovery, comparisons, scholarships, exams, content management, and AI-assisted admission prediction using Groq.

**ToonsCode** | *Coding Institute Website & Learning Portal* | toonscode.com 2024 – Present

- Built a React/TypeScript, FastAPI, MongoDB, Redis, and WebSocket platform supporting course discovery, inquiries, admissions, blogs, SEO landing pages, and administrative workflows.
